SUMMARY

Supply chain data analyst with 1+ years of experience across inventory and procurement. Converts raw ERP data into SQL extracts, Power BI dashboards, statistical models, and Monte Carlo simulations that drive stocking and cost decisions.

EDUCATION

University of Southern California, Marshall School of Business — Los Angeles, CA December 2026
Master of Science in Global Supply Chain Management (STEM-designated) | GPA 3.87

University of British Columbia, Sauder School of Business — Vancouver, Canada May 2024
Bachelor of Commerce in Operations and Logistics | Outstanding International Student Award (\$10,000)

WORK EXPERIENCE

APM Terminals — Inventory Intern June 2026 – August 2026
Los Angeles, CA

- Consolidated \$12.7M in spare-parts inventory data from **19 Power BI reports** and raw **SQL** extracts against IFS (ERP); evaluated demand, part age, movement frequency, and transaction history to identify \$5.8M of obsolete and excess stock supporting a \$4M reduction target.
- Built **10+ Power BI dashboards** on stock health, department ownership, and scrap opportunity; created DAX measures and modeled relationships across PO receipt, issue, date, and cost-center tables.
- Built a Downtime-Sensitive Inventory Optimization Model (EOQ, Critical Ratio, Poisson Distribution) for ROP and stock-level recommendations, validated via **@RISK Monte Carlo simulations** with 2.44% deviation.
- Built **HTML tools** to automate manual work: "Liucent," a purchase-order calendar that replaced manual requisition tracking in IFS, and the LAX Spare Parts Finder that cut part-lookup time from 10 minutes to under 1.

Baiyu Pharmaceutical Co. — Procurement Specialist August 2024 – July 2025
Chengdu, China

- Led procurement execution for 20+ monthly purchase requests totaling \$200K+ across equipment, materials, and projects, maintaining a 100% on-time completion rate.
- Negotiated pricing and terms, achieving cost reductions of up to 30% while meeting all technical requirements.
- Collaborated cross-functionally with Engineering, Finance, and Legal teams to evaluate supplier qualifications.

Baiyu Pharmaceutical Co. — Operations Planning Intern June 2022 – August 2022

- Built weekly inventory dashboards tracking 40+ SKUs across raw materials, packaging, WIP, and finished products, improving planning visibility and reducing overstock risk.
- Automated inventory planning using **advanced Excel**, reducing manual processing time by 70%.
- Conducted root-cause analysis on product returns and budget variances using Lean methodology.

RELEVANT PROJECTS

Caterpillar Supply Chain Network Design December 2025

- Modeled the financial and risk case for a \$2.04B capacity expansion, projecting 36.8% ROI at a 2.7-year payback; evaluated a sourcing reallocation projected to cut annual tariff exposure from \$832M to \$33M.

Maersk in Vietnam: Capstone Project October 2025

- Assessed Maersk's Vietnam operations via PEST/SCOR analysis to identify the binding constraint on throughput; proposed an automation roadmap based on cost and impact to maximize ROI.

TECHNICAL SKILLS

- Analytics:** Advanced Excel (pivot tables, Solver, XLOOKUP), SQL, Python, predictive modeling (JMP), linear programming, forecasting, route optimization, Monte Carlo simulation (@RISK).
- Reporting:** Power BI (data manipulation, charts, DAX), Tableau, dashboard & KPI design, ERP (IFS).
- Business:** Inventory / Material / Logistics Planning, Lean Methodology, Strategic Sourcing, Negotiation, S&OP.

CERTIFICATIONS

- Lean Six Sigma Green Belt – USC Marshall School of Business
- The Essentials Professional Certificate – CSCMP Supply Chain Foundations
- Advanced Diploma in Modelling and Analytics for Supply Chain Management – ALISON
